# TRANSPORT Simulation Environment

*Installation*

**Thomas Kempka**
GFZ German Research Centre for Geosciences
University of Potsdam

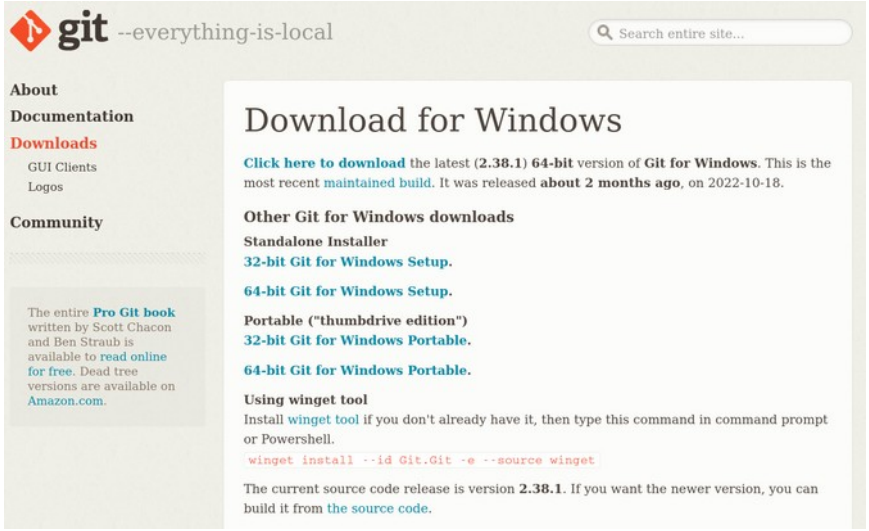

# Software prerequisites: mambaforge and git

https://github.com/conda-forge/miniforge#mambaforge

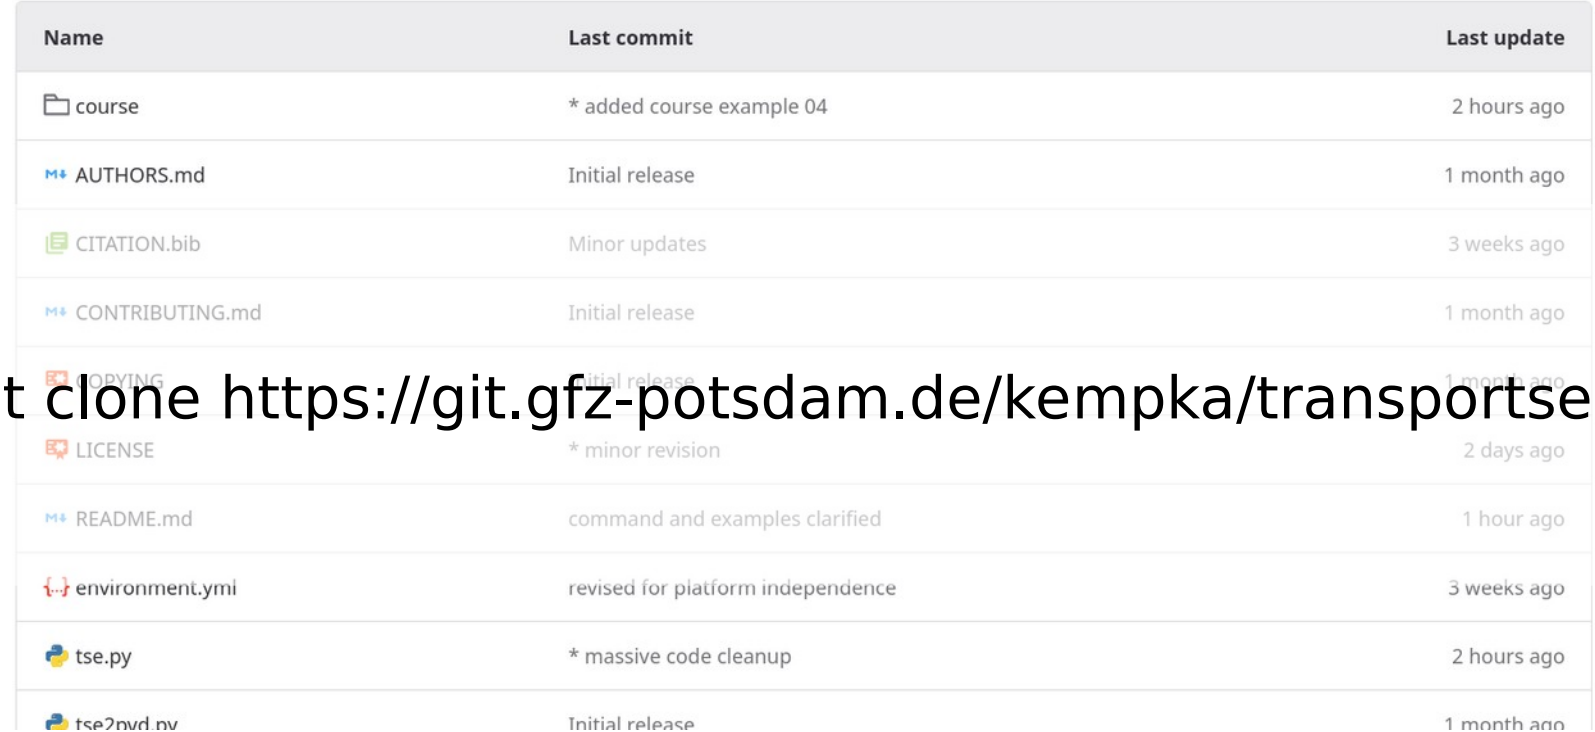

**Mambaforge**

Latest installers with Mamba in the base environment:

| OS | Architecture | Download |
|---|---|---|
| Linux | x86_64 (amd64) | Mambaforge-Linux-x86_64 |
| Linux | aarch64 (arm64) | Mambaforge-Linux-aarch64 |
| Linux | ppc64le (POWER8/9) | Mambaforge-Linux-ppc64le |
| OS X | x86_64 | Mambaforge-MacOSX-x86_64 |
| OS X | arm64 (Apple Silicon) | Mambaforge-MacOSX-arm64 |
| Windows | x86_64 | Mambaforge-Windows-x86_64 |

# Install mamba/conda environment

environment.yml 207 bytes

```yaml
name: transportse
channels:
  - conda-forge
dependencies:
  - ipython
  - joblib
  - matplotlib
  - mkl
  - numba
  - numpy
  - phreeqpy
  - pip
  - pyevtk
  - scipy
  - pip:
    - icc-rt
    - intel-openmp
```

```
mamba|conda env create
  --file=environment.yml
```

# Alternative: Just install most relevant python libraries into your existing environment

environment.yml 207 bytes

```yaml
name: transportse
channels:
  - conda-forge
dependencies:
  - python
  - cmcrameri
  - matplotlib
  - mkl
  - numba
  - numpy
  - phreeqpy
  - pip
  - pyevtk
  - scipy
  - pip:
    - icc-rt
    - intel-openmp
```

```
mamba|conda install joblib numba
numpy phreeqpy pyevtk ipython
```

# Activate new environment

environment.yml 207 bytes

```yaml
name: transportse
channels:
  - conda-forge
dependencies:
  - ipython
  - joblib
  - matplotlib
  - mkl
  - numba
  - numpy
  - phreeqpy
  - pip
  - pyevtk
  - scipy
  - pip:
    - icc-rt
    - intel-openmp
```

```
mamba|conda activate transportse
```
